FLASHES

The humanitarian situation in Yemen is considered one of the most tragic situations in the world, according to UN reports and international organizations which emphasized that the situation in Yemen is disastrous in various areas of life ..

Ma`akam Developmental Foundation (mdf) is among the most important NGO organizations that initiated the relief of the population and alleviate the crisis, based on its slogan ..

"One Hand is Building .. and the Other is Relieving"..

In its work, it relies on humanitarian response plans prepared by international organizations, targeting all segments of society, including the displaced, host communities and the most vulnerable families, taking into account the children and women segment.

In light of these difficult circumstances, the Foundation was able to work according to a parallel strategy for relief

work that combines relief and sustainability through the effective recovery of service institutions to restore service and provide them to the population, especially in the field of education, health, water and environmental sanitation, and secure livelihoods for families who lost their families or individuals who lost their jobs And their jobs because of the conflict that continues to this point, to a sustainable development service. We are pleased through this report to present to you the most important achievements made in this year 2019, which exceeded the number of beneficiaries:

(1,075,064) beneficiaries

For this figure to be a symbol of honor and a message of gratitude to the people of giving, as well as ambassadors of good and humanity at home and abroad.

We are always with yo... One hand is building... and the other is relieving

Dr.Abdulhameed Saif

Foundation Chairman

OUR BUSINESS FIELDS

**Not just a
mouthful...
Food is Life**

FOOD SECURITY SECTOR

Yemen is suffering a real humanitarian catastrophe - according to UN reports - which affected millions of children and women. Ma`akum developmental Foundation(mdf) was among the most important organizations that responded to the distress calls made by the population ... meeting the urgent need that preserves human dignity and right to life. We also contributed during this year to provide an emergency relief service and positively affected us in improving the living, educational and health conditions of the population.
