

Project Report

Supply and install filters at the Dialysis center in Al-Jomhori Hospital

Taiz city- Yemen

Project Title: Supplying and installation filters at Dialysis Station at Al-Jomhori Hospital Taiz- Yemen.

Financing and implementing agency: Ma`akum Developmental Foundation mdf.

The beneficiary: Dialysis Station at Al-Jomhori Hospital.

Coordination: Health Cluster, OCHA Office in Al-Turbah, Al-Jomhori hospital and Dialysis Station at Al-Jomhori Hospital.

Number of beneficiaries: 150 patients

Implementation period: 25 -26 November 2021.

150 patients benefit

from Dialysis Center in Al-Jomhori Hospital – Taiz City.

Target of Intervention:

Saving 150 lives of failure kidney patients that are treated periodically in the center.

Project Activities:

- Coordination with Health Cluster.
- Coordination with Al-Jomhori`s administration and the administration of Dialysis center in the hospital.
- Supplying and installation the filters to Dialysis station.

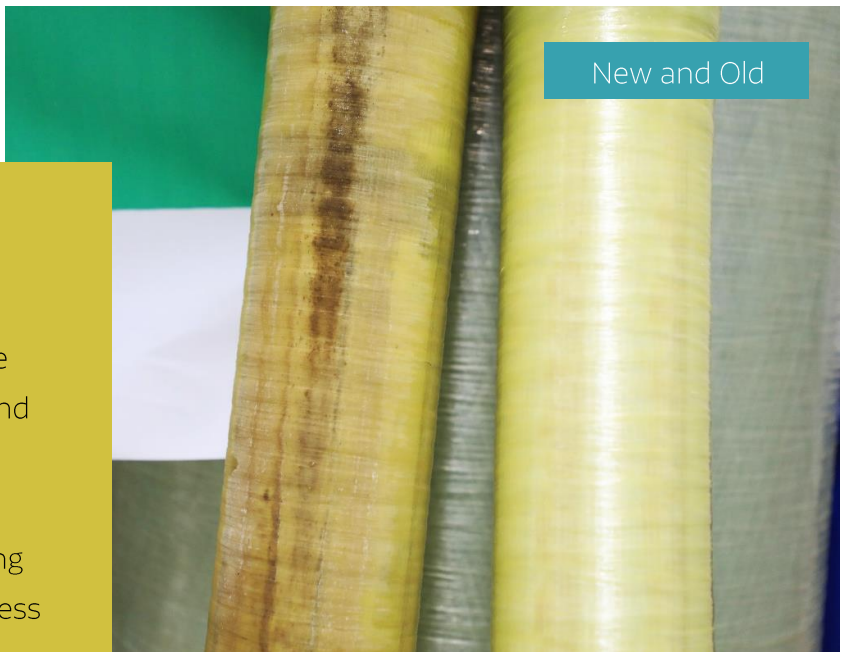

Results:

1. Supplying and installation four filters to Dialysis station.
2. Purchasing and supplying an anti-sedimentation material to protect the dialysis plant from the continuous accumulation of salts.

project impact

The project will have a significant impact on the station's continuation and saving the lives of 150 patients from the repercussions of stopping the station or its weakness in producing pure water.

Recommendations:

- Continuing to make efforts and follow up the needs of the dialysis center in the event of any emergency.
- Permanent coordination with the administration of Dialysis center.
